Best Interest Analysis

EXHIBIT 3 TO EXHIBIT BOOK

BEST INTERESTS ANALYSIS

The following document is the Best Interests Analysis (the "Analysis") of the Debtors. This Analysis assumes the Debtors' estates are substantively consolidated solely for the purposes of actions associated with the confirmation and consummation of the Plan, including, but not limited to, voting, confirmation and Distribution.

The purpose of the Analysis is to provide information in order that the Bankruptcy Court may determine that the Plan is in the best interests of all Classes of Claimants and Equity Interest Holders impaired by the Plan. The Analysis was prepared to assist the Bankruptcy Court in making this determination and it should not be used for any other purpose.

The Analysis assumes that the hypothetical Chapter 7 liquidation is effected via the orderly sale of the businesses of the Debtors and Non-Debtor Affiliates as going concerns. Because the Asbestos Channeling Injunction would not be available in a Chapter 7 liquidation, the value realized from the orderly sale of the businesses in all likelihood would be reduced as a result of a buyer's concern regarding the risk of asbestos liability in the acquisition of the assets. Further, the lack of the Asbestos Channeling Injunction may preclude an orderly sale of the businesses as going concerns, in which case an actual liquidation of assets would be required. In that case, values realized would be further reduced.

Conversion of the Chapter 11 Cases to Chapter 7 would likely result in additional costs to the estates. Costs of liquidation under Chapter 7 of the Bankruptcy Code would include the compensation of a trustee and other professionals retained by the trustee, including attorneys, financial advisors and consultants; asset disposition expenses; litigation costs related to possible fraudulent transfer actions and the resolution of asbestos and other Claims; all unpaid expenses incurred by the Debtors in the Chapter 11 Cases that are allowed in the Chapter 7 case; and Claims arising from the operations of the Debtors during the pendency of the Chapter 11 Cases.

The Analysis presents estimated net proceeds if the Debtors and the Non-Debtor Affiliates were liquidated under the provisions of Chapter 7 of the Bankruptcy Code and the allocation of such proceeds applied in strict priority to satisfy Claims against the Debtors.

The Analysis is limited to presenting information that is the representation of management in good faith based on assumptions believed to be reasonable. The Analysis has not been examined or reviewed by independent accountants in accordance with standards promulgated by the American Institute of Certified Public Accountants. The estimates and assumptions, although considered reasonable by management, are inherently subject to significant uncertainties and contingencies beyond the control of management. Accordingly, there can be no assurance that results shown could be realized if a liquidation occurred and actual results in such case could vary materially from those presented.

All defined terms are as defined in the Glossary unless otherwise noted. The accompanying notes are an integral part of the Analysis.

Footnotes to Best Interests Analysis

A summary of the assumptions used by Blackstone and management of the Debtors and Non-Debtor Affiliates in preparing the Analysis is set forth below.

Note A. *Proceeds from orderly sale of businesses*

In a Chapter 7 liquidation, it is assumed the businesses of the Debtors and Non-Debtor Affiliates would be sold as going concerns for cash to more than one buyer in a series of transactions to generate maximum value. The proceeds from these sale transactions are assumed to be equal to the Core Business Value of the Reorganized Debtors and Non-Debtor Affiliates (\$2.2 billion to \$2.6 billion with a midpoint of \$2.4 billion, as further described in Section 2.8 of the Disclosure Statement), less a discount factor. Unlike a Chapter 11 reorganization, Chapter 7 does not provide for the issuance of the Asbestos Channeling Injunction. Notwithstanding a presumed ability to sell assets in a sale under Bankruptcy Code §363 or the availability of an injunction under Bankruptcy Code §105, the discount factor quantifies the probability that the businesses could not be sold for fair value or at all because of the perceived risk that asbestos liability would follow the assets sold.

U.S. taxes due on the gain from the orderly sale of the Debtors' and Non-Debtor Affiliates' businesses are assumed to be offset by existing tax attributes and deductions generated by payments made to Claimants in the Chapter 7 case with the exception of approximately \$5 million of state taxes. It is assumed that for tax purposes, the sale of businesses in foreign countries will be structured as stock sales to take advantage of the predominant tax treaty exemptions for the payment of taxes on the gain generated by such sales. Taxes due in foreign jurisdictions represent foreign transfer taxes, withholding taxes, and estimated local taxes attributable to separating the businesses in each foreign subsidiary and taxes due on the gain from the sale of stock in those jurisdictions that do not have a tax treaty exemption.

Note B. *Other Assets*

Other assets include: cash assets, payments from third-party fraudulent transfer actions, asbestos insurance assets and tax assets.

Cash assets include Grace's Cash. In addition, in the Chapter 7 liquidation, Cash also includes the cash value of corporate-owned life insurance policies, which are assumed terminated in a liquidation. In the Chapter 11 reorganization, in which residual equity value is projected, Cash includes proceeds from the assumed exercise of in-the-money management and employee stock options. This amount is calculated based on the projected number of shares and fully diluted reorganization equity value per share.

Payments from third-party fraudulent transfer actions reflects the following: Grace was named in a class action suit filed in California state court alleging that Grace's 1996 reorganization transaction with Fresenius and its 1998 reorganization with Sealed Air involved fraudulent transfers and demanding repayment of such transfers. Prior to the filing of the Chapter 11 Cases, two other similar class actions were filed. In November 2002, Fresenius and Sealed Air announced that they had reached an agreement in principle to settle Asbestos Claims and fraudulent transfer Claims related to the respective transactions. Pursuant to the Fresenius Settlement Agreement and the Sealed

Air Settlement Agreement, respectively, and the provisions of the Plan, Fresenius shall make the Fresenius Payment and Sealed Air shall make the Sealed Air Payment. These agreements specifically require the existence of the Asbestos Channeling Injunction. Because the Asbestos Channeling Injunction is not available in a Chapter 7 liquidation, the Analysis assumes these settlement payments would not be made. It is assumed, however, that a Chapter 7 trustee would pursue similar fraudulent transfer actions. Because the outcome of this litigation cannot be known, a range is shown from zero, at the low end, to a level of Sealed Air proceeds equal to the Sealed Air Payment on a present value basis assuming a discount rate of 6% and a three year time period to collect, at the high end. It is assumed in a Chapter 7 liquidation scenario that Fresenius and/or Sealed Air would pay certain priority taxes directly to the IRS and file a General Unsecured Claim against the Debtors for indemnity under tax sharing agreements entered into at the time of the 1996 reorganization.

Asbestos insurance assets are calculated based on the assumed asbestos liability (see Note E). In a Chapter 7 liquidation, the low case reflects the risk that recovering this asset is delayed for one year, assuming a 6% discount rate.

Certain tax assets are projected to be utilized over time in the Chapter 11 reorganization by projected income. In a Chapter 7 liquidation, any excess tax attributes, after offsetting gains resulting from the liquidation, including gains on asset sales and cash repatriation, would expire unused.

Note C. *Costs associated with a Chapter 7 liquidation*

Costs associated with a Chapter 7 liquidation are assumed to include fees and costs for professionals retained by the Chapter 7 trustee, including legal, financial and claims processing advisors, estimated at \$500,000 per month for eighteen months, for, among other things, pursuing the fraudulent transfer actions described in Note B and resolving Asbestos Claims. In addition, it is assumed the Chapter 7 trustee would receive payments equal to 1.5% of the estimated net proceeds available for allocation. Additional brokerage fees would be necessary for the orderly sale of Grace's businesses and other costs. Brokerage fees are calculated conservatively at 0.50% of gross proceeds, for a range of \$6 million to \$7 million.

Note D. *PBGC*

As of September 30, 2004, the Debtors and Non-Debtor Affiliates had fourteen funded, defined benefit pension plans, each of which is qualified under Section 401(a) of the IRC. In total, these plans were under funded by approximately \$202 million. In the event a buyer chose not to assume the obligations of the underfunded defined pension liability, it is assumed that the PBGC would assume that liability. The amount represents the net difference between the assumed increase in a buyer's determination of value from saving future pension costs and the resulting estimated PBGC Claim, which is assumed to be asserted on the basis of termination of the plans. The termination liability is assumed to be approximately \$394 million, which is consistent with the Debtors' April 2004 filing with the PBGC and further described in Plan § 8.1.4 - Non-Dischargeable ERISA Liability.

Note E. *Assumed asbestos liabilities*

For purposes of this analysis, asbestos liabilities are assumed to equal the sum of (x) the maximum aggregate amounts that would satisfy the conditions precedent in Section 7.6.1(v) and Section 7.6.1(w) of the Plan; plus (y) an estimate of Previously Settled/Adjudicated Asbestos Claims.

The Financial Information reflects Grace’s estimate of its expected consolidated financial position, results of operations, and cash flows as if the Plan were adopted as proposed. The Financial Information was prepared on the basis of the global operations of Grace, which include certain domestic and international subsidiaries and affiliates that are not debtors under the Bankruptcy Code.

WHILE GRACE BELIEVES THE ASSUMPTIONS UNDERLYING THE PROFORMA AND PROSPECTIVE FINANCIAL INFORMATION, WHEN CONSIDERED ON AN OVERALL BASIS, ARE REASONABLE IN LIGHT OF CURRENT CIRCUMSTANCES AND EXPECTATIONS, NO ASSURANCE IS GIVEN THAT ANY OF THE FINANCIAL RESULTS WILL BE REALIZED. All estimates and assumptions underlying the Financial Information were developed by Grace. The assumptions disclosed herein are those that Grace believes are significant to the understanding and evaluation of the Financial Information. Although Grace believes the assumptions used are reasonable under the circumstances, such assumptions are subject to significant uncertainties such as: the loss of senior management and other key employees; changes in demand for Grace’s products; changes in foreign currency exchange rates or interest rates; inflation that differs from that projected; changes in the business, competitive or political environment; technological breakthroughs, product innovations or competitive pricing strategies that negatively affect the profitability of a product or line of business; availability and cost of raw materials, energy and labor; and other factors affecting Grace’s operations. Despite Grace’s efforts to foresee and plan for the effects of changes in these circumstances, Grace cannot predict their impact with certainty. Consequently, actual financial results will likely vary from that shown in the Financial Information, and the variations could be material.

The Financial Information was prepared by Grace in conformity with guidelines promulgated by the United States Securities and Exchange Commission (“**SEC**”) and the American Institute of Certified Public Accountants (“**AICPA**”). II. SUMMARY OF PRINCIPAL UNDERLYING ASSUMPTIONS

A. *PROPOSED PLAN OF REORGANIZATION – GENERAL TERMS*

The proposed Plan is considered a “hypothetical assumption” (as defined under AICPA guidance for prospective financial presentations) until such Plan is confirmed by the Bankruptcy Court. The Plan may change significantly as proceedings under Grace’s Chapter 11 case further define and measure the claims and liabilities that will be allowed and payable under a confirmed plan. This Financial Information assumes that:

- Grace will satisfy all unresolved asbestos-related claims as outlined in the Plan through the contribution of Grace common stock and warrants, and assets available under certain third-party agreements, to an asbestos trust established under Bankruptcy Code Section 524(g). The value of such contribution will total approximately \$1,613 million, including the estimated cost of trust administration, (such amount being equal to the maximum aggregate asbestos-related liability that would satisfy the conditions precedent set forth in Sections 7.6.1(v) and (w) of the Plan). Asbestos claims subject to pre-petition judgments or agreements (approximately \$87 million) will be resolved as part of general unsecured claims.
- Grace will distribute approximately \$1,100 million in cash and \$149 million in Grace common stock to satisfy all Administrative, Priority Tax and Class 9 claims payable at the effective date as follows:
 - Bank debt including accrued interest as of September 30, 2004- \$634 million
 - Environmental remediation - \$238 million
 - Special pension programs - \$8 million
 - Trade accounts payable and litigation - \$49 million – including:
 - Class 9 claims - \$46 million
 - Administrative claims - \$3 million
 - Tax claims - \$182 million
 - Fees and other - \$50 million
 - Asbestos claims subject to pre-petition judgments or agreements - \$87 million
- Grace will satisfy all other non-asbestos liabilities (estimated to be approximately \$495 million as of September 30, 2004 and \$487 million as of December 31, 2004), as they become due and payable over time (“**Reinstated Liabilities**”).
- Grace will finance the payments noted above assumed to be as of December 31, 2004 (which total \$3,349 million) with cash on hand (approximately \$184 million); newly issued Grace common stock (approximately \$647 million in value); value available from Sealed Air

Corporation (approximately \$985 million in cash and securities) and Fresenius Medical Care (approximately \$115 million in cash) under litigation settlement agreements; initial borrowings under a new debt facility (approximately \$800 million drawn); future operating cash flows (approximately \$487 million); and warrants (initially approximating \$130 million in value), if required, to fund costs of the asbestos trust related to asymptomatic personal injury claims if and when they materialize.

B. PROJECTIONS OF OPERATING RESULTS – GENERAL ASSUMPTIONS

- Methodology – The projections of operating performance were prepared using a strategic planning methodology by each of Grace's reportable business segments, Davison Chemicals and Performance Chemicals, which were then consolidated. Executive management of Grace reviewed the segment and consolidated results for achievability based on recent historical performance, expected economic conditions, investment plans and other relevant factors, and adjusted the strategic plans accordingly to reflect the results of operations and cash flows that are reasonably expected to be achieved over the projection period.
- Business Environment - The operating projections assume the continuation of a stable economic and political environment with variability in global economic activity over the projection period as experienced in a typical business cycle.
- Sales – Consolidated sales are projected to increase approximately 6% annually over the projection period (after taking into account added sales from acquisitions completed in 2004), consistent with Grace's experience over the most recent five-year business cycle. The projections assume that revenue growth will come from the success of Grace's operating strategies and include increasing business with existing customers, developing new customers, penetrating new markets, commercializing new products and acquiring related businesses.
- Gross Product Margins – Gross margin on product sales (defined as sales less cost of goods sold and depreciation) is assumed to remain relatively constant as a percentage of sales over the projection period and consistent with Grace's past performance. Selling price increases through improved product offerings and the success of productivity initiatives are assumed to offset inflation on direct production costs.
- Expenses – Operating expenses which include selling, general administrative and research and development costs are assumed to increase over the projection period based on factors of general inflation, business strategy and specific considerations for personnel-related costs such as compensation, health care, retirement benefits and insurance.

III. PROPOSED PLAN OF REORGANIZATION

The proforma financial information of Grace presented herein reflects the accounting effects of the proposed Plan (1) as if it were put in effect on the date of Grace's most recent publicly reported consolidated balance sheet for September 30, 2004, and (2) as if it were in effect for the historical reporting periods for the year ended December 31, 2003 and for the nine-months ended September 30, 2004. Such proforma financial statements show how Grace's assets, liabilities, equity and income would be affected by the Plan as follows:

A. ADDITIONAL PRE-PETITION EXPENSE AND INSURANCE

Reflects the accrual of added asbestos and other costs necessary to adjust Grace's balance sheet to assumed allowed claim amounts, including accrued interest, as described in the Plan. Certain amounts are recorded at net payable value, which assumes funding will occur at or near the effective date. Reinstated Liabilities are recorded at estimated amounts payable over time, and on a net present value basis where appropriate. Insurance assets are recorded at the net present value of recoverable amounts from the assumed level of future payments to asbestos claimants. Tax accounts are adjusted accordingly for both added deductible liabilities and insurance income.

B. BORROWINGS UNDER NEW DEBT AGREEMENTS

Reflects the assumed establishment of a new \$1,000 million debt facility to fund settled claims payable at the effective date (approximately \$800 million) and to provide working capital and letters of credit (approximately \$200 million) for continuing operations. Future periods reflect an assumed 7% interest rate on outstanding borrowings. No such facility currently exists but, in Grace's view based on discussions with prospective lenders, one can be established before the effective date of the Plan.

C. FRESenius AND SEALED AIR SETTLEMENTS

Reflects the value, in the form of cash and securities, expected to be realized under each litigation settlement agreement as follows: \$115 million of cash from Fresenius Medical Care; and, \$985 million of estimated value from Sealed Air Corporation (calculated as of September 30, 2004) in the form of \$512 million of cash plus accrued interest at 5.5% from December 21, 2002, and 9 million shares of Sealed Air common stock valued at \$47 per share. Tax accounts have been adjusted to reflect the satisfaction of Grace's recorded liabilities by way of these third-party agreements. The Fresenius settlement amount will be payable to Grace and will be accounted for as income. The Sealed Air settlement assets will be paid directly to the asbestos trust by Sealed Air and will be accounted for as satisfaction of a recorded liability.

D. PAYMENT OF REMAINING PRE-PETITION LIABILITIES

Reflects the accounting for the transfer of funds and securities to settle obligations payable under the Plan at the effective date. Tax accounts are adjusted to reflect

the change in nature of Grace's tax assets from predominately temporary differences to predominately time-limited tax net operating losses. Non-asbestos Reinstated Liabilities of approximately \$495 million estimated as of September 30, 2004 and \$487 million as of December 31, 2004 are assumed to be paid in cash when due.

E. PROFORMA CONSOLIDATED STATEMENT OF OPERATIONS

Reflects the elimination from Grace's historical financial statements of: (1) charges and expenses directly related to Chapter 11, (2) the \$50.0 million net gain from property litigation recorded in the third quarter of 2004, and (3) the addition of interest and new common shares related to the assumed financing of the Plan.

IV. PROJECTIONS OF OPERATING RESULTS

The operating projections consider the performance of each reportable business segment (Davison Chemicals and Performance Chemicals) over the past five years and executive management's view of the total revenue and earnings the underlying businesses can achieve over the projection period, given expectations about general economic and specific industry conditions. The segment level projections were prepared on a basis of global business operations, which include certain domestic entities and international subsidiaries and affiliates of Grace that are not debtors under Chapter 11 of the Bankruptcy Code.

A. GENERAL ECONOMIC FACTORS

The Financial Information has been developed assuming that global economic and political conditions will be stable and that the overall sales growth and cost productivity achieved by Grace over the past five years will continue over the projection period. Grace's product portfolio is diversified across several end-use industries and geographic markets. This diversification provides a buffer against adverse changes in any one industry or region and, absent a period of extended recession globally, provides a reasonable basis for projecting sales growth consistent with past experience.

B. INDUSTRY FACTORS

In addition to general economic conditions globally, Grace's sales are affected by the demand for products used in the construction industry (primarily non-residential construction), the petroleum refining industry, the food packaging industry (particularly rigid containers), the plastics industry and, to a lesser degree, the automotive, personal care, coatings, pharmaceuticals and biotechnology industries. The average growth rates experienced by these industries over the past five-year business cycle forms the base for Grace's assumed product line growth rates over the projection period.

C. INVESTMENT ASSUMPTIONS

The rate of growth of Grace's sales over the past five years has been influenced by a relatively steady and consistent level of sales from the acquisition of businesses and new products that complement existing product offerings or

expand geographic presence. These acquisitions and new products have generally been synergistic by way of leveraging infrastructure, better utilizing sales channels, and accessing new markets with current products. The Financial Information assumes a continuation of this growth strategy through targeted acquisitions, self-constructed added capacity and new product commercialization similar to that which Grace has pursued in the past several years.

D. COST INFLATION AND PRODUCTIVITY

Inflation is projected to average approximately 2% to 3% globally over the projection period based on economic indicators from independent sources. The general increase in costs caused by inflation is assumed to be offset by a combination of sales from new product offerings and productivity improvements from Six Sigma and other cost reduction and efficiency programs, resulting in gross product margins that are consistent over the projection period with those achieved on average by Grace over the past five years. Selling and research and development expenses are projected to increase at rates generally above that of average inflation, reflecting investments in programs that are designed to achieve projected sales growth. General and administrative expenses are also expected to increase at an above-average inflation rate reflecting historical trends in these expenses, which includes items like insurance, pensions and professional services.

E. FOREIGN CURRENCY EXCHANGE RATES

Foreign currency exchange rates are assumed to remain consistent with those in effect at September 30, 2004.

F. DEPRECIATION AND AMORTIZATION

Depreciation is projected in two components. Current base depreciation is reduced by about 2% annually through the projection period. Depreciation on new capital investments, including a portion from investments in acquired businesses, is projected using an average 10-year depreciable life. Amortization of identifiable intangible assets acquired in business combinations is also assumed to be over an average 10-year economic life.

G. INTEREST EXPENSE AND INTEREST INCOME

The Financial Information assumes an effective interest rate of 7% on both average debt outstanding over the projection period and on Reinstated Liabilities with actual or estimated fixed and determinable payment dates. Interest expense is offset by interest income on the outstanding cash balance at an investment earnings rate of 3%.

H. CHAPTER 11 EXPENSES AND CHARGES

Chapter 11 expenses are projected in 2004 only and reflect an estimate based on past experience and level of activity. This line item also includes the added accruals for asbestos-related claims, environmental claims and other costs necessary to adjust Grace's consolidated balance sheet to reflect liability estimates under the proposed definitions of allowed claims in the Plan. Certain of these

costs, such as emergence fees and financing fees, are only payable and accountable when incurred. The liability estimates in the Plan are subject to challenge both in definition and in measurement. Accordingly, Grace will adjust its recorded liabilities for such matters when definitional and measurement uncertainties are resolved by the Bankruptcy Court.

I. INCOME TAXES

Income tax expense is calculated at an effective global rate of 35% based on Grace's assumed split of taxable income and interest on debt of approximately 50% in the United States and 50% in the rest of the world.

V. SIGNIFICANT ACCOUNTING MATTERS AND ASSUMPTIONS

A. ACCOUNTING POLICIES

Refer to Grace's Form 10K/A for the year ended December 31, 2003 incorporated herein by reference.

B. CASH AND CASH EQUIVALENTS

Grace will retain a minimum of approximately \$250 million in cash for ongoing business liquidity. A revolving credit facility is assumed to fund, if necessary, working capital and other operating cash requirements that fluctuate with time. For these purposes, access to approximately \$200 million in revolving line-of-credit borrowings is assumed to be established as of the effective date. No borrowings under the line of credit facility are assumed during the projection period.

C. WORKING CAPITAL

The projections reflect an annual increase in inventories, accounts receivables and accounts payable consistent with the increase in sales. The projections assume a slight lowering of the accounts receivable days sales outstanding with inventory days on hand and accounts payable days outstanding remaining relatively stable.

D. PROPERTIES AND EQUIPMENT, NET

Capital expenditures, including an allocation of assets acquired in business combinations, are assumed to equal annual depreciation over the projection period.

E. NET CASH VALUE OF COMPANY OWNED LIFE INSURANCE ("COLI")

The Financial Information assumes a \$22 million conversion of net cash value to cash in the early part of 2005 reflecting a settlement with the Internal Revenue Service that would initiate the termination of Grace's broad-based COLI policies. This termination of COLI policies will also result in a tax gain and the utilization of approximately \$59 million of Grace's net operating loss carryforwards for federal income tax purposes. The remaining COLI policies are assumed to increase in cash value at approximately 9% annually, consistent with policy terms and past experience.

F. ASBESTOS-RELATED INSURANCE

Grace is entitled to a partial cash reimbursement under existing product liability insurance policies with respect to the cost of its asbestos-related lawsuits and claims. Insurance reimbursements are collectible as the liabilities are satisfied by the asbestos trust. The asbestos-related insurance asset represents the estimated nominal value of amounts expected to be received from solvent carriers under relevant insurance policies, based on the assumed funding levels required for the asbestos trust. The amount also approximates the net present value of future insurance recoveries based on an assumed actuarial profile of future trust payouts.

G. DEBT

Short-term debt represents borrowings under various lines of credit and other miscellaneous borrowings that are assumed to be satisfied shortly after the effective date. Long-term debt assumes an initial \$800 million borrowing to fund the Plan including the replacement of all undrawn letters of credit including letters of credit outstanding under the pre-petition facilities. The debt facility is assumed to bear interest at an average of 7% annually. It is assumed that the outstanding balance is retired as cash in excess of minimum working capital needs becomes available and from proceeds under asbestos-related insurance policies.

H. PENSION LIABILITIES

The underfunded defined benefit pension liability represents the net present value of the difference between the fair value of pension trust assets and the accumulated benefit obligation of the related pension plans. The projections assume that, except for 2004 where pension plan payments are governed by the Bankruptcy Court, annual pension expense, including the amortization of accumulated experience losses, will be funded in the same year as expensed.

I. LIABILITIES SUBJECT TO COMPROMISE THAT ARE REINSTATED

Liabilities subject to compromise will be discharged at the effective date of the Plan except for the following non-asbestos liabilities that will be reinstated and satisfied in the normal course of business:

- Capital lease obligations of approximately \$3 million are assumed to be satisfied under contractual terms.
- Reserves for environmental remediation of approximately \$115 million as of September 30, 2004 and \$107 million as of December 31, 2004 are assumed to be funded based on agreements or settlements with relevant governmental agencies and property owners.
- Post-retirement health and pension benefits of approximately \$186 million are assumed to be funded as benefit obligations are due under the terms of such arrangements.
- Reserves for litigation and contracts of approximately \$41 million are assumed to be funded under stated and/or negotiated terms and settlements.

- Reserves for tax and other pass-through contingencies of approximately \$150 million are assumed to be funded as settlements are reached.

J. INCOME TAXES

It is expected that Grace will receive federal and state income tax deductions in the amount equal to the cash and securities transferred to fund asbestos-related and other tax-deductible liabilities. These income tax deductions will result in net operating loss carryforwards ("NOLs") for federal income tax purposes. It is assumed that deferred tax liabilities related to core operations will be reduced over time but will be replaced with an equal amount of originating temporary differences. For purposes of the Financial Information, it is assumed that all tax benefits are available upon the effective date, that no valuation allowance is necessary and that no restrictions on NOL utilization will apply. However, the realization of the tax benefits of NOL carryforwards depends on the amount and timing of future U.S. taxable income and the avoidance of limitation events. These projections assume that sufficient U.S. taxable income will be generated to utilize recorded tax benefits before they expire. It is further assumed that the structuring of the new debt facility will involve the recognition of significant taxable dividends from Grace's foreign subsidiaries. Depending on the timing of such dividends, it is possible that they would have the effect of exhausting some or all of Grace's NOLs and thereby limiting the financial benefit. This Financial Information assumes that the timing and structure of the Plan will be sufficiently flexible to avoid this effect on Grace's NOLs. In particular, it is assumed that foreign tax credits and/or cash repatriation incentives under the American Jobs Creation Act of 2004, rather than NOLs, will be available to offset such income thereby preserving NOLs to offset future taxable income.

K. STOCK OPTIONS

Grace has granted stock options that upon exercise would add 8.2 million shares to those outstanding and \$103 million in conversion proceeds. For purposes of these projections, 6.8 million of options are assumed to be exercised at the effective date, generating \$75 million in conversion proceeds. Also, the Financial Information assumes that Grace will replace cash-based long-term incentive compensation arrangements with a stock-based plan that will be accounted for as expense at the time of grant.

L. WARRANTS

Under the Plan, Grace will issue warrants to the asbestos trust that are exchangeable into voting common stock for a penny-a-share to fund, if necessary, required payments under the trust arrangements for asymptomatic asbestos claimants. The number of warrants will be equal to (when combined with the initial payment of common stock to the asbestos trust) 50.1% of the value of Grace's equity capital at the effective date after all other dilutive and issued common shares are considered. Warrants will be assumed exchanged, and therefore dilutive for earnings per share calculations, at the time trust liabilities are determined to be probable and estimable. The Financial Information assumes that the net present value of the allowed amount for qualified asymptomatic

asbestos personal injury claims is \$130 million at the effective date. This amount, and any required funding in excess of this amount, will be satisfied with Grace common stock through the exercise of warrants as claims are paid by the asbestos trust.

M. COMMON STOCK

Under the Plan, Grace will issue common stock to partially satisfy certain claims and liabilities. For purposes of this Financial Information, such common stock is assumed to be valued at approximately \$17 per share at the effective date based on the mid-point of the fully-diluted reorganized equity value per share range included as part of the Plan of Reorganization, increasing annually by 6%.

Description of Warrants

W. R. Grace & Co.
Indicative Terms for the Warrant Agreement Documenting
Warrants to be Issued to the Asbestos Trust Pursuant to the Plan¹

General	Warrants to purchase Parent Common Stock.
Holders	Issued to the Asbestos Trust for the benefit of the Holders of Asbestos PI-AO Claims.
Number of Warrants	A number of Warrants such that, fully diluted for the exercise of the Warrants and all other Parent Common Stock being issued pursuant to the Plan, the aggregate shares (i) underlying the Warrants plus (ii) of the Parent Common Stock portion of the Debtors' Payment represent 50.1% of the fully diluted Parent Common Stock outstanding. ²
Exercise Price	\$0.01 per share of Parent Common Stock.
Exercise	Warrants may only be exercised to the extent necessary to fund the payment of Asbestos PI-AO Claims by the Asbestos Trust. However, in order to help preserve the value of net operating loss carryforwards, the Asbestos Trust may not exercise more than 50% of the total Warrants in the first three years after the Effective Date. In the event that the amount of Asbestos PI-AO Claims exceeds the value received by the Asbestos Trust through the exercise and sale of the Parent Common Stock underlying 50% of the Warrants during such three year period, then the Reorganized Debtors will loan to the Asbestos Trust amounts sufficient to pay such Claims, with the loan to be repaid through exercise of Warrants and sale of the underlying shares of Parent Common Stock after the end of such three year period.

¹ All terms are as defined in the Plan

² The number of Warrants will not be known until the Debtors' Payment is made on the thirty-first (31st) day after the Effective Date. Based on the valuation range in Section 2.8 of the Disclosure Statement, the number of Warrants would be in the approximate range of 47 million to 56 million.

Maturity	Asbestos Trust Termination Date.
Transferability	The Warrants may not be transferred except to a successor trust that has assumed the Asbestos Trust's obligations to pay Asbestos PI-AO Claims. Subject to the Reorganized Debtors' redemption rights as described below, Parent Common Stock issued upon exercise of the Warrants will be sold as soon as commercially practicable into the market, with the proceeds to be used to pay Asbestos PI-AO Claims. ³
Redeemability	As the Warrants are exercised, the Reorganized Debtors shall have the right to substitute cash equal to the market value of the shares to be issued, rather than causing the Parent to issue shares.
Change of Control	In the event of a change of control of Parent, the Warrants will automatically be converted into the right to receive cash in an amount equal to the number of Warrants outstanding immediately prior to the change in control multiplied by the market price of Parent Common Stock immediately prior to the change of control. Such right may be exercised from time to time only if and to the extent necessary to pay Asbestos PI-AO Claims and will expire upon termination of the Asbestos Trust.
Antidilution	In the event of any stock split, stock dividend, combination of shares or reclassification of the Parent Common Stock, the number of shares for which the Warrants are exercisable and the exercise price per share will be proportionately adjusted.

³ Parent Common Stock contributed to the Asbestos Trust (as distinguished from stock received on exercise of the Warrants) will be subject to the three year sale limitation in Section 7.1.1 of the Plan.
